10th SLEuro
Advanced Workshop on SLE

Dear colleagues,

It is our great pleasure to welcome you to the 10th SLEuro Advanced Workshop on SLE, taking place on 5-6 March 2027 in Zagreb, Croatia. Set in one of Central Europe's most vibrant capitals, this landmark 10th edition offers a stimulating environment for scientific exchange, education, and collaboration in systemic lupus erythematosus.

The hallmark of the SLEuro Advanced Workshops has always been learning through discussion. Reaching our 10th anniversary underscores the ongoing dedication of our European community to advancing lupus care and research. This milestone edition continues that tradition by creating an interactive forum where participants can engage directly with faculty and colleagues through case-based discussions, educational sessions, and debates on specific clinically and scientifically relevant scenarios.

Our scientific programme brings together leading European experts to address both fundamental concepts and practical challenges. Together, we will explore the approach to the differential diagnosis and contemporary management of organ-specific disease features, the role of B cells in the pathogenesis of SLE, the concept of preclinical SLE, clinical trials in SLE, as well as therapeutic strategies. Additionally, dedicated sessions will address multidisciplinary models of care and strategies for optimizing patient pathways.

By combining state-of-the-art lectures with highly interactive formats, we hope to create a meeting that is educational, thought-provoking, and directly relevant to daily practice, with rich opportunities for networking and building lasting professional connections.

We very much look forward to welcoming you to Zagreb for an inspiring and rewarding workshop.

Warm regards,

Luís Inês
SLEuro President

Ioannis Parodis
SLEuro President Elect

Ivan Padjen
