9th SLEuro

**Advanced Workshop
on SLE**

PRESENTATION

Dear colleagues,

It is our great pleasure to welcome you to the **9th SLEuro Advanced Workshop on SLE**, taking place on **25-26 September 2026** in Belgrade, Serbia.

We are delighted to host this meeting in Belgrade and to bring together colleagues from across Europe and around the world who share a common commitment to advancing lupus care and research. Beyond its scientific programme, we hope this Workshop will provide a stimulating environment for exchanging ideas, learning from one another, and building lasting professional connections in an open and collaborative atmosphere.

The hallmark of the SLEuro Advanced Workshops has always been learning through discussion. This 9th edition, ***Transforming Lupus Care: Expert Strategies for Clinical Excellence***, continues that tradition by creating an interactive forum where participants can engage directly with faculty and colleagues while working through challenging clinical scenarios encountered in everyday practice.

Together, we will explore the management of joint involvement, lupus nephritis, haematological manifestations, and pregnancy in SLE, discussing different management approaches and sharing practical experience.

The programme also features a dedicated session on establishing and developing a Lupus Clinic, during which experienced faculty members will put into discussion multidisciplinary models of care, overcoming organisational challenges, and strategies for improving patient pathways across diverse healthcare systems.

In addition, the programme will address many of the rapidly evolving areas that are shaping contemporary lupus care, including biomarkers, treat-to-target strategies, glucocorticoid optimisation, antiphospholipid syndrome, interferon biology, and clinical trials.

We hope you will find this Workshop both useful and enjoyable, with plenty of opportunities for discussion, exchange, and networking. We look forward to welcoming you to Belgrade in September 2026.
